

ALFALFA VARIETY PLACEMENT

The map on page 69 can be used to determine which alfalfa varieties are recommended for your area's climate challenges. Also, use the chart below to place the correct variety to help manage common diseases and pests in your area, and to match quality to your desired cutting frequency. To view more specific insect and disease information, refer to pages 56, 57, and 63 to 65.

- GENUITY® ROUNDUP READY® VARIETIES
- CONVENTIONAL VARIETIES
- VARIETIES WITH ADDITIONAL INSECT AND DISEASE RESISTANCE
- HARVXTRA™ VARIETIES

PRODUCT DORMANCY MAP

Fall dormancy and winterhardness are important considerations in alfalfa seed selection. This map shows CROPLAN® seed varieties that match fall dormancy and winterhardness zones in various regions of the United States.
