

# FROM SEED TO YIELD.

Insights from the week of: September 21, 2020

## CP5073SS/RIB

- Excellent emergence and early season vigor; ideal for early planting
- Will reward in yield potential with increased management; responds highly to both nitrogen and fungicide
- Nice flex ear for moderate planting populations
- High yield potential hybrid that moves across productive to average acres with strong drought tolerance
- Consistent high yields for 2 years in row, with great expectations for this year as well

2018 and 2019 Answer Plot trials: Princeton, Decatur, LeRoy, Springfield and Bowen, IL, Rochester, Perrysville, and Demotte, IN

## CP3120E

- An early group 3 WinPak® variety with exciting high yield potential
- Strong phytophthora tolerance and emergence, ideal for early season planting
- Taller soybean with outstanding branching capability, with above average standability
- Mixed pubescence between the two components, representing the “WinPak variety look”
