

# FROM SEED TO YIELD.

Insights from the week of October 19, 2020

## New XtendFlex® Soybeans are here.

### CP2741XF

- Intermediate-bushy type plant that is medium tall in stature
- Standout performance in Ohio across yield environments and soil types in limited supplier data
- 5-6 bu/A better than key Roundup Ready 2 Xtend® checks in limited supplier data
- Very good no till adaptability and plant height observed in stressed areas of fields
- Manage average PRR tolerance with high seed treatment

2020 Answer Plot trial, Attica, OH.

2019 Supplier data - 18 comparisons across SD, IA, MN, WI, IL, IN, OH, and MI.

### AG30XF0

Comments provided by Dekalb/Asgrow Technical Agronomists  
Brad Miller and Roy Ulrich

- Strong yield potential in this RM; good choice for no till environment
- Average PRR field tolerance with 3a gene
- Avoid extremely poorly drained soils
- Below average FELS tolerance, similar to AG30X8, and SDS tolerance
- Very good standability noted late season

## New XtendFlex® Soybeans are here.

### AG33XF1

Comments provided by Dekalb/Asgrow Technical Agronomists  
Brad Miller and Roy Ulrich

- Medium-tall product with good standability and excellent SDS package
- Demonstrates strong branching at lower populations
- Place on average to better yielding environments with good drainage
- Average PRR field tolerance with 1C gene
- Excellent performance on coarse to medium soils

2020 Answer Plot® trial: Cedarville, OH

### CP3640XF

- Versatile, easy to place offense x defense WinPak® variety
- Very good standability and no till adaptability
- Average PRR field tolerance best managed with seed treatment
- Complementary plant structures: taller defensive line for increased height on challenging acres and medium statured bushy line to stack nodes and spread out on offensive acres
- The two components of this WinPak® variety have different flower and pubescence colors

2020 Answer Plot trial: Cedarville, OH
