

FROM SEED TO YIELD.

Insights from the week of: October 19, 2020

CP5678VT2P *VTDoublePRO*

- CP5678VT2P is broadly adapted across yield environments and soil types.
- This hybrid can handle tough acres, but also excellent performance potential on irrigated productive acres across the corn belt.
- A moderate response to population and fungicide hybrid allows for a variety of management options with stability.
- As a high response to nitrogen product, nitrogen should be managed -- low late season nitrogen loss or deficiency can cause this hybrid not to fulfill its yield potential.
- Highest yielding CROPLAN® product in 115 CHT across six southern Answer Plot locations.

FROM SEED TO YIELD.

Insights from the week of: October 19, 2020

CP5073VT2P/SS *VTDoublePRO* *SmartStax*

- A high yield potential product that has been outstanding coming south into the 112-118 RM market.
- Strong early plant vigor allows for early planted into cool and/or reduced tillage soils.
- Medium ear flex allows for versatility in plant population, medium response to population.
- Recommend fungicide when southern rust is present.
- Top performing CROPLAN® hybrid in 2020 Answer Plot® 110 CHT testing.
 - (15 locations -10/12/2020 data pull)
