

FROM SEED TO YIELD.

Insights from the week of: September 21, 2020

CP5340VT2P

VT DoublePRO®

- CP5340VT2P is showing outstanding heat and stress tolerance to pollinate and grain fill under high heat and tough environments.
- This hybrid can handle tough acres, but also excellent performance potential on irrigated productive acres across the southern corn market.
- Medium stature plant with above average agronomics, and a flex ear in girth.
- Fungicide is recommended especially when planted late for southern rust protection.

CP4825X

**ROUNDUP READY 2
XTEND
SOYBEANS**

- A high yield potential product that has been stable across the late 4 RM geography.
- Excellent standability for high-end acres that tend to result in taller plants.
- Very good defensive package for SDS, PRR and FEL.
- Chloride Excluder for salt prone environments.
