

FROM SEED TO YIELD.

Insights from the week of: October 19, 2020

New XtendFlex® Soybeans are here.

CP2440XF

- CP2440XF is a 2.4RM WinPak® variety from CROPLAN® consisting of CP2341XF and CP2441XF
- Broadly adapted WinPak variety for a wide range of acres with best performance in central and west regions
- Solid defensive product with acceptable ratings on PRR, IDC and standability to go with strong BSR and excellent SSC
- Tall plant with average standability, don't over-populate in irrigated environments
- CP2440XF is a great product in the XtendFlex® trait platform to fill the acres where we are currently using with CP2400X

AG25XF1

- AG25XF1 is a key XtendFlex® soybean from Asgrow® for the mid group 2 RM
- Key **tough acre** soybean that will be able to handle stress acres while bringing a solid agronomic package
- Very strong on BSR and above average on SWM
- Average IDC, do not recommend positioning on high pH fields
- Medium-tall plant with average standability, do not recommend over-population
- For those using AG25X8 in the west, the AG25XF1 will be a great transition product into the XtendFlex® portfolio

Crop performance depends on many factors beyond the control of WinField United, including without limitation, rainfall, temperature, soil type, crop production patterns or unforeseen disease pressure. Answer Plot, CROPLAN, WinField, and WinPak are trademarks of WinField United. The Roundup Ready 2 Xtend® traits may be protected under numerous United States patents. It is unlawful to keep CROPLAN®, Roundup Ready 2 Yield® or Roundup Ready 2 Xtend® soybeans for planting or transfer to others for use as a planting seed. Asgrow®, Channel®, Droughtgard®, Roundup Ready 2 Xtend®, XtendFlex®, VT Double Pro®, RIB Complete® and Smartstax® are trademarks used under license from Bayer Group. All other trademarks are the property of their respective owners.

FROM SEED TO YIELD.

Insights from the week of: October 19, 2020

New XtendFlex® Soybeans are here.

CP3941XF

- Key XtendFlex® variety that works from East to West with strong performance in the Kansas market
- CP3941XF has strong standability, PRR, and SDS tolerance
- Excellent SSC, stress tolerance and emergence ratings
- No rating on IDC yet - use caution on fields with a history of RKN
- With excellent yield potential and the ability to handle stress environments, CP3941XF should be stable across both low and high yield environments

AG27XF1

- Lead group 2 XtendFlex® variety from Asgrow
- Position and manage product like AG27X8's from Asgrow in the Roundup Ready 2 Xtend® platform
- Focus acres will be on the highly productive soils with aggressive management for top-end yield potential
- Keep off high pH soils and plant at moderate populations for this medium-tall variety
- Able to fit on wide or narrow row planting and work well in Nebraska and western environments
