

FROM SEED TO YIELD.

Insights from the week of October 5, 2020

CP5678VT2P *VTDoublePRO*

- CP5678 continues to be a top choice for grain acres across much of the Southern US due to its ear flex and stress tolerance that allow it to perform across a broad range of populations and yield environments.
- In addition to consistent grain yield, CP5678 has a robust stalk and wide leaves that can deliver impressive silage tonnage potential if needed.
- Growers have depended on CP5678 to deliver top yield potential because of premium agronomics such as great stalks, great test weight, and reduced risk in areas with Greensnap and Goss's Wilt.

2020 Answer Plot® trials: Lorena- TX, Taylor, TX,

CP5370VT2P *VTDoublePRO*

- CP5370 continues to deliver best in class yields based on preliminary 2020 data from Memphis, TX.
- CP5370 is a proven winner across a broad range of yield environments, from tough 100 bu/A to elite 300 bu/A
- In addition to great yields potential, CP5370 has outstanding agronomics including stalks, drought tolerance and premium grain quality.
