

Boron 15%

By WINFIELD UNITED

High-Quality Granular Borate

Boron is essential to nitrogen metabolism, cell division, and increased flowering and fruiting. This granular, sodium borate-derived product blends easily with other dry fertilizers to deliver nutrition when plants need it most.

FEATURES AND BENEFITS

- Virtually free of impurities with a very low analysis of heavy metals
- Approved for use in conventional and organic agriculture systems
- Helps correct nutrient deficiencies in a variety of crops

Application Rates

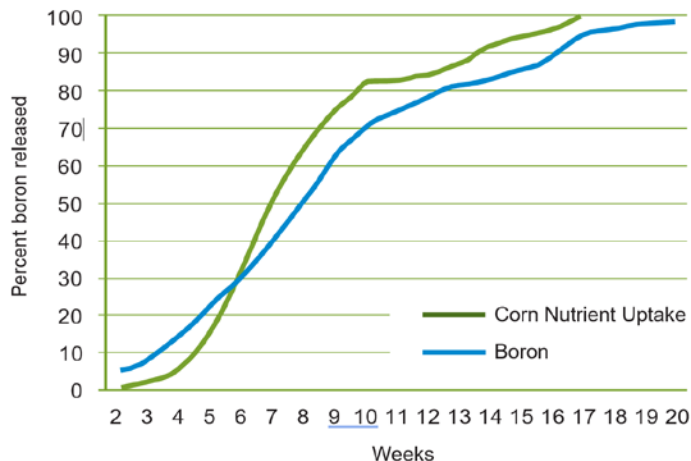

Typical Application Rates per Acre*	
Boron 15%	Boron delivered (Pounds/A)
3.5 pounds	0.525
7.0 pounds	1.05
14.0 pounds	2.1
21.0 pounds	3.15

*Soil testing is recommended to accurately determine proper application rates.

Precise Treatments

Tissue sampling and analysis with NutriSolutions® tissue testing just before key growth stages will pinpoint nutrient deficiencies and recommend specific plant nutrients, so you apply what your crop needs.

Release of Boron 15% and Boron Uptake by Corn

REGION
All

USE RATE†
2-3 lbs/A depending on crop needs and soil test results

APPLICATION GUIDE†
Blend with other agricultural-grade fertilizers and apply evenly

ACTIVE INGREDIENTS†
15%: Boron
