

Dimetric Charged™

By WINFIELD UNITED

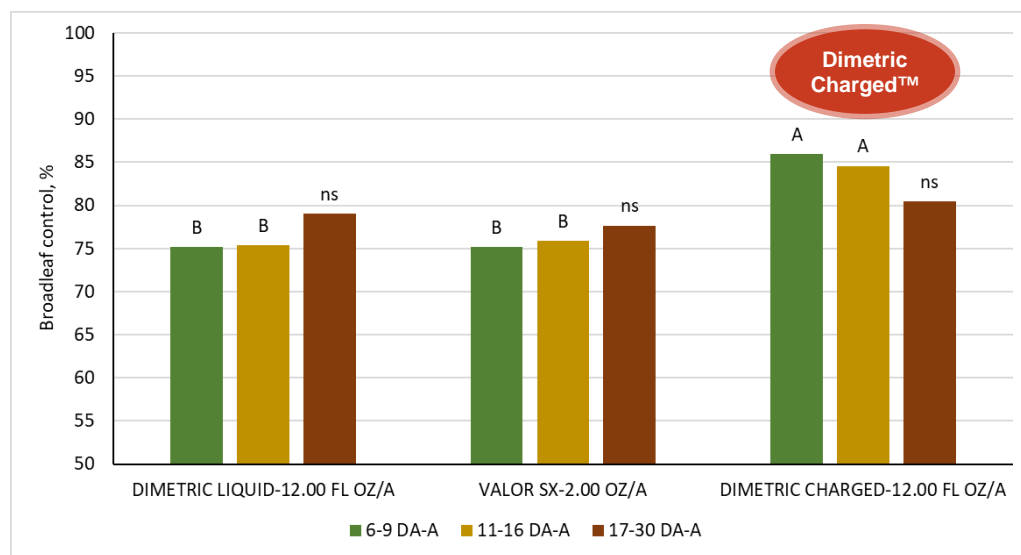

Liquid Metribuzin Plus Flumioxazin

The first liquid metribuzin + flumioxazin formulation available, Dimetric Charged™ is an effective and innovative burndown or preemergence product. With two modes of action, it's also an excellent resistance management tool.

FEATURES AND BENEFITS

- Liquid SC formulation is easy to mix
- Manageable use rate
- Performs as good or better than comparable chemistries in burndown control
- Great option for glyphosate-resistant weeds

Dimetric Charged Has Improved Broadleaf Burndown Control

Excellent Residual Control

WinField United field research showed Dimetric Charged provided great residual control of the following weeds: Palmer Amaranth, Velvetleaf, Common Waterhemp, Common Ragweed, Prickly Sida, Redroot Pigweed, Common Cocklebur*

*Comparison of metribuzin (12 fl oz/A) alone vs. flumioxazin (2.5 oz/A) alone vs. Dimetric Charged (12 fl oz/A).

REGION
All

USE RATE
Soybeans: 12-18 fl oz/A
Fallow: 12-24 fl oz/A

APPLICATION GUIDE
See label

ACTIVE INGREDIENTS
32.77%: Metribuzin
7.32%: Flumioxazin
59.91%: Other

PACKAGING
2 x 2.5 – gallon jugs
