

Volt-Edge™ a VaporGrip® Xtra Agent

Adjuvant

VOLATILITY REDUCING AGENT (VRA)

Meets the VRA requirements for many dicamba applications.

Approved VRA*

Features & Benefits

- Buffers solution pH to help reduce free protons that can lead to volatility
- Approved as a VRA for many tank mixtures; Always check the manufacturers' websites for recent tank mix approvals
- Must be used with a separate, approved drift reducing agent (DRA) like OnTarget®, OPTIFY™ XX, or Valcheck® II

Use Rate

Use Volt-Edge™, a VaporGrip Xtra Agent at a minimum rate of 20 fluid ounces per acre (20 fl oz/A). Always follow dicamba product label requirements.

Water carrier rate (Gallons of water per acre: GPA)	Use rate (Fluid ounces per acre)
15 GPA	20 fl oz/A
16-24 GPA	26 fl oz/A
25+ GPA	32 fl oz/A
