

Crop Booster Manganese 5%

By WINFIELD UNITED

Foliar Chelated Manganese

Help optimize plant health and growth with this foliar secondary nutrient product. Manganese plays a key role in plant immune systems and is especially important in legumes.

FEATURES AND BENEFITS

- Can be foliar applied with post-emergent herbicides
- Compatible with glyphosate and other nonselective herbicides
- Specially formulated with chelating agents plus a proprietary blend of stabilizing agents for optimal compatibility

Application Rate

Application type	Rate (Quarts per Acre)*
Nutrient maintenance	1 to 1.5
Moderate deficiency	1.5 to 2
Severe deficiency	2
In Wisconsin only	0.15 pounds (0.31 gallons) per acre for beans (dry, snap), lettuce, oats, onions, radishes, raspberries, soybeans, spinach, sudangrass, wheat
	0.10 pounds (0.21 gallons) per acre for all other crops

*Apply in 10 to 20 gallons of water

Precise Treatments

Tissue sampling and analysis with NutriSolutions® tissue testing just before key growth stages will pinpoint nutrient deficiencies and recommend specific plant nutrients, so you apply what your crop needs.
