

# Iron Up<sup>®</sup>

By WINFIELD UNITED

## Solution for Iron Deficiencies in Tough Soils

Corrects iron nutrient deficiencies in alkaline and calcareous soils in a formulation that is completely water soluble and 100% ortho-orth EDDHA.

### FEATURES AND BENEFITS

- 100% ortho-ortho EDDHA formulation is key to keeping iron available longer in high-pH soils
- Compatible with a wide range of fertilizers and pesticides
- Can be formulated into NPK fertilizers as a source of iron
- Water-soluble formulation

### Micronutrient Benefits

Iron increases chlorophyll content in the plant, which helps improve photosynthetic activity in plants. Iron is essential for nodulation and nitrogen fixation in legumes.

### Application†

**Soil:** Apply to soil around plants as powder, liquid, spray injection or through drip irrigation.

**In-furrow (Soybeans):** Mix 1 to 3 pounds of product in water in a minimum ratio of 1 pound product:2 gallons water. Apply 2 to 10 gallons/A.

**Foliar:** Best results are obtained when applied in early morning or late afternoon after irrigation or rainfall. Do not apply to trees bearing mature fruit or if crop is under stress.

### Application Rates\*

Deficiency	Pounds/Acre
Maintenance	0.5 - 1.0
Moderate Deficiency	1.0 - 1.5
Severe Deficiency	1.5 - 2.0

\* Or as determined by tissue analysis

- REGION**  
Alkaline and calcareous soils

---

- USE RATE†**  
Varies by deficiency. See label.
