

MAX-IN[®] Manganese FOUR HW

By WINFIELD UNITED

The Next Generation of Foliar Nutrition

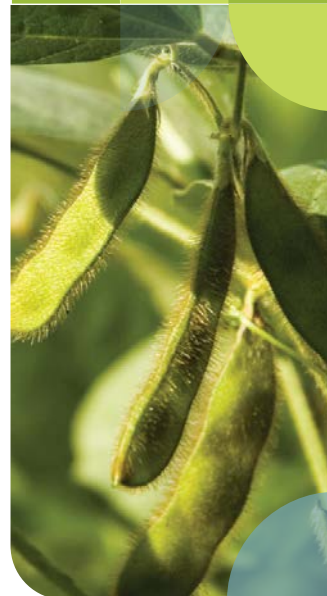

MAX-IN[®] Manganese FOUR HW micronutrient is an effective foliar-applied source of manganese. It is specially formulated for use on soybeans in conjunction with glyphosate. The use of an AMS product like Class Act[®] NG[®] is always recommended when tank mixing with glyphosate.

FEATURES AND BENEFITS

- Contains CornSorb[®] technology, a patented crop-based adjuvant system that helps increase nutrient uptake
- Special formulation of liquid manganese with chelating agents
- Manganese is essential for photosynthesis, and is especially important in legumes

Mixing Instructions When Used with Glyphosate

1. Fill tank ½ full with water and agitate.
2. Add AMS source like Class Act[®] NG[®] and agitate.
3. Add MAX-IN[®] Manganese FOUR HW and agitate.
4. Add pesticides and agitate.
 - NOTE: If wettable powders or water-dispersible granules (WDG) are used, slurry them in water prior to adding.

REGION
All

USE RATE[†]
Soybeans: 1-2 quarts/A. See label for other crops and for specific rates and timing.

APPLICATION GUIDE[†]
For foliar or aerial application.

ACTIVE INGREDIENTS[†]
4.0%: Manganese

PACKAGING
2 x 2.5 – gallon jugs
250-gallon mini-bulk
Store >40°F

[†] Always read and follow product labels directions.
