

MAX-IN[®] Ultra Manganese

By WINFIELD
UNITED

The Next Generation of Foliar Nutrition

MAX-IN[®] Ultra Manganese micronutrient is an effective foliar-applied source of manganese that can be used in many crops, and can be tank-mixed with glyphosate. The use of an AMS product like Class Act[®] NG[®] is always recommended when tank mixing with glyphosate.

FEATURES AND BENEFITS

- Contains CornSorb[®] technology, a patented crop-based adjuvant system that helps increase nutrient uptake
- Includes SureTank[®] technology for enhanced compatibility with glyphosate
- Manganese is essential for photosynthesis, and is especially important in legumes

Mixing Instructions When Used with Glyphosate

1. Fill tank ½ full with water and agitate.
2. Add AMS source like Class Act[®] NG[®] and agitate.
3. Add MAX-IN[®] Ultra Manganese and agitate.
4. Add pesticides and agitate.
 - NOTE: If wettable powders or water-dispersible granules (WDG) are used, slurry them in water prior to adding.

REGION
All

USE RATE[†]
1-2 quarts/A most crops. See label for specific rates and timing by crop.

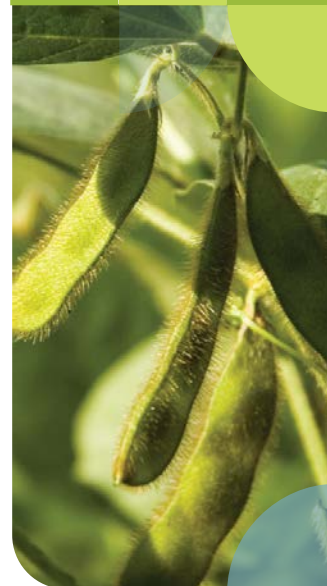

APPLICATION GUIDE[†]
For foliar or aerial application.

ACTIVE INGREDIENTS[†]
5.0%: Manganese

PACKAGING
2 x 2.5 – gallon jugs
250-gallon mini-bulk
Store >40°F

[†] Always read and follow product labels directions.
