

SRN25B

Easy-To-Use Slow Release Fertilizer with Boron

A water-soluble fertilizer formulation to deliver supplemental nitrogen and boron in many crops.

FEATURES AND BENEFITS

- Easy to handle and well-suited for ground and aerial applications.
- Provides both slow and quick release sources of nitrogen which is absorbed directly into the plant.
- Provides boron in a safe delivery system to help increase yield potential.
- Safe to apply to foliage with low salt and minimal phytotoxicity in a non-corrosive formulation.
- Compatible with other NPK fertilizers and can be mixed with most pesticides, though a jar test is always recommended for new tank mixes.

General Information

One gallon of SRN25B contains 0.05 pounds of elemental boron (B) and 2.5 pounds of nitrogen (N). 25% of the total nitrogen in SRN25B is slow release – which equates to 0.62 pounds per gallon. Recommended for use on field crops, vegetable crops, fruit and nut crops, commercial Christmas trees, ornamentals and nursery stock.
