

SRN28

Easy-To-Use Slow Release Fertilizer

A water-soluble fertilizer formulation to deliver supplemental nitrogen in many crops.

FEATURES AND BENEFITS

- Easy to handle and well-suited for ground and aerial applications.
- Provides both slow and quick release sources of nitrogen which is absorbed directly into the plant.
- Safe to apply to foliage with low salt and minimal phytotoxicity in a non-corrosive formulation.

General Information

One gallon of SRN28 contains 3 pounds of nitrogen (N). 72% of the total nitrogen in SRN28 is slow release – which equates to 2.16 pounds per gallon. Slow release nitrogen can help provide improved crop safety, and may help increase nitrogen absorption, translocation and remobilization when used on a variety of crops.
