

Sovereign

Foliar Fertilizer for Soybeans

Offers a broad range of supplemental nutrients that may help enhance vigor and optimize yields in soybeans, especially during periods of stress.

FEATURES AND BENEFITS

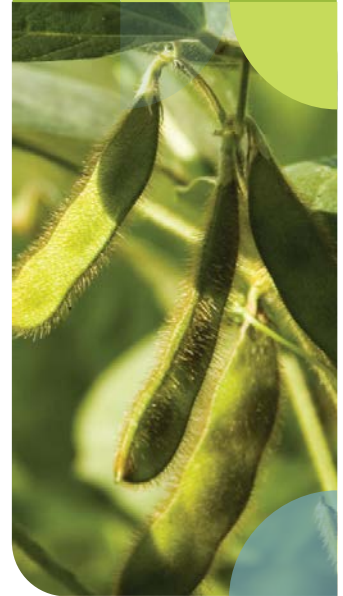

- Chelated with EDTA to allow mixing with orthophosphate fertilizers and glyphosate.
- Can be applied from early vegetative through mid-reproductive stages for flexibility in application window.
- Offers a combination of nutrients in one fertilizer product.

Product Characteristics

Sovereign refined foliar fertilizer is designed for application to soybeans via spray equipment. The nutrients in Sovereign fertilizer are specially formulated to help overcome nutrient deficiencies that can reduce plant growth, vigor and yield. Sovereign fertilizer can also be blended with other concentrated micronutrients if severe deficiencies occur.

Conditions Where Sovereign Fertilizer May Help

- Nutrient deficiencies in soil
- Nutrient deficiencies from poor root development, diseased roots, wet soil, dry soil, herbicide injury
- High yield conditions

REGION
All

USE RATE†
Soybeans: 2 quarts/A typical

APPLICATION GUIDE†
Typically applied to soybeans in-season, but can be used in other crops/turf at labeled rates.

ACTIVE INGREDIENTS†
8.0%: Nitrogen
15.0%: Phosphate (P₂O₅)
8.0%: Potash (K₂O)
0.03%: Boron
0.33%: Iron
0.41%: Manganese
0.017%: Molybdenum
0.17%: Zinc

PACKAGING
2 x 2.5 – gallon
250 – gallon mini bulk
