

Arctic[®] 3.2EC

By WINFIELD UNITED

Arctic[®]: Put a Freeze on your Bug Problem

Arctic[®] insecticide is a broad-spectrum pyrethroid for use on a wide range of crops. This permethrin insecticide, formulated to easily mix with most other herbicides, insecticides, fungicides and liquid fertilizers, provides excellent control of many insects including cutworm, Japanese beetle, and woolly bear caterpillar.

FEATURES AND BENEFITS

- Emulsifiable concentrate formulation readily mixes with water cutting down on application costs and labor
- Provides excellent control and residual activity
- Labeled on a wide variety of crops including alfalfa, avocado, corn, cucurbit vegetables, peaches, peppers, potatoes, soybeans, tomatoes, and others

Adjuvants Enhance Performance

For optimized, coverage, and product performance add in a combination of Preference[®] and InterLock[®] or MasterLock[®] alone.

Arctic[®] Soybean Application Rates

Soybean Insect	Rate (fl. oz. per Acre)
Bean leaf beetle	2 to 4
