

Carnivore[®]

By WINFIELD UNITED

Carnivore[®]: The Kochia King

Carnivore[®] herbicide is a premix of three active ingredients (Bromoxynil, Fluroxypyr, MCPA) from two sites of action (Groups 4 and 6) formulated as one powerful brand for controlling kochia and other broadleaf weeds in Northern spring wheat, barley, oats, and CRP grasses.

FEATURES AND BENEFITS

- Three active ingredients and two modes of action specifically designed to control glyphosate tolerant kochia and other broadleaf weeds, such as marestail, pigweeds, and Russian thistle
 - Fluroxypyr – Group 4: Strong kochia control
 - Bromoxynil – Group 6: Fast acting control, usually show symptoms in 1-2 days
 - MCPA – Group 4: Controls a broad spectrum of broadleaf weeds

Application Rates and Timing by Crop

| Crop | Rate (fl. oz. per acre) | Timing |
|-------------|---|--|
| Wheat | <4" weed height: 16 oz. 4-8" weed height: 16 to 24 oz. | Postemergence from two-leaf state up to and including flag leaf emergence |
| Barley | <4" weed height: 16 oz. 4-8" weed height: 16 to 24 oz. | Postemergence from two-leaf state up to and including flag leaf emergence |
| Oats | <4" weed height: 16 oz. 4-8" weed height: 16 to 24 oz. | Postemergence from two-leaf state up to and including flag leaf emergence |
| CRP Grasses | 16 to 32 | Grasses from three-leaf stage. Broadleaf weeds up to eight-leaf stage, 4" in height or 2" in diameter |

USE RATE[†]

Varies based on many application factors. See label for details.

ACTIVE INGREDIENTS[†]

MCPA-EHE*: 27.30%
 Octanoic acid ester of bromoxynil**: 25.48%
 Fluroxypyr***: 10.08%
 Other Ingredients: 37.14%
 Total: 100%
 Equivalent to:
 * MCPA acid: 1.67 pounds per gallon
 ** Bromoxynil: 1.67 pounds per gallon
 *** Fluroxypyr acid: 0.67 pounds per gallon

PACKAGING

2 x 2.5 gallons
 135-gallon shuttles
