Easy to use AMS premix

Class Act® NG® Adjuvant offers an easy-us-use formulation that combines CornSorb® additive (a crop-based adjuvant system), a non-ionic surfactant, and ammonium sulfate (AMS) for water conditioning in a convenient liquid premix.

FEATURES AND BENEFITS

- Fits glyphosate and glufosinate applications.
- Conditions water in the tank and works on the leaf surface to drive the herbicide into the plant.
- Contains CornSorb® additive which increases uptake and speed of herbicide action.
- Pre-dissolved liquid AMS – no nozzle plugging and sedimentation.
- Formula designed to minimize foaming.

More Class Act® NG® Uptake in Weed Leaves compared to AMS

Amount of NIS and Dry AMS in Class Act® NG® per 100 gallons of Spray Solution

Class Act® NG® (gallons)		Nonionic Surfactant (quarts)		Dry AMS (pounds)
2.5	=	2.0	+	8.5
5.0	=	4.0	+	17.0

USE RATE†
2.5-5 gallons in 100 gallons

APPLICATION GUIDE†
Add to the spray tank before glyphosate or other herbicides

ACTIVE INGREDIENTS†
Ammonium Sulfate, corn syrup, alkyl polyglucoside: 50.5%
Constituents ineffective as spray adjuvant: 49.5%
Total: 100%

PACKAGING
2 x 2.5 gallons
Mini-bulk
