Delta Gold®
by WinField

Insect protection for corn, soybeans, cotton, sunflower and other crops

Protection Against Destructive Pests

Delta Gold® insecticide provides broad-spectrum control against a wide range of damaging insects in a variety of crops, including canola, corn (field, pop and sweet), cotton, pome fruit, rapeseed, sorghum, soybeans, sunflowers, tree nuts and vegetables (bulb, corm, cucurbits, fruiting, root and tuberous).

A pyrethroid insecticide, Delta Gold® insecticide features the active ingredient deltamethrin. It provides fast knockdown and activity over a wide range of temperatures.

Easy Handling and Mixing

Delta Gold® insecticide offers flexible application options, such as tank mix compatibility with a variety of herbicides, fungicides, other crop protection products and MAX-IN® plant nutrition products.

The liquid formulation flows smoothly and disperses easily in water. It may be applied by ground, air or chemigation.

Adjuvants

Adjuvants such as Superb® HC (COC), Destiny® HC (MSO), Preference® (NIS) or Rivet®/Inergy® may be added to improve performance. Coverage throughout the crop canopy, including the lower leaves, is critical for maximum efficacy. To lock in spray coverage and deposition and lock out drift, include InterLock® or PowerLock® adjuvants.

Ingredients

Delta Gold® insecticide contains 1.5 pounds active ingredient per gallon.
Insects Controlled

Delta Gold® insecticide controls a broad spectrum of insects. Following are examples of insects controlled in a few crops. See label for appropriate rates and all labeled insects and crops.

**Corn**
- Armyworm (all species)
- Chinch bug
- Click beetle
- Corn earworm
- Corn rootworm (adult)
- Cutworm
- European corn borer
- Flea beetle
- Grasshopper

**Cotton**
- Aphid
- Armyworm (all species)
- Boll weevil
- Cabbage looper
- Cotton bollworm
- Cotton fleahopper
- Cotton leafperforator
- Cotton leafworm
- Cutworm
- European corn borer
- Grasshopper

**Soybeans**
- Armyworm (all species)
- Bean leaf beetle
- Cabbage looper
- Click beetle
- Corn earworm
- Corn rootworm beetle (adult)
- Cutworm
- European corn borer
- Grape colaspis (adult)
- Grasshopper
- Green cloverworm
- Japanese beetle (adult)
- Leafhopper

Japanese beetle (adult)
June beetle (adult)
Masked chafer (adult)
Southern corn borer
Southwestern corn borer
Stalk borer
Stink bug
Webworm

**Application Rate and Timing**

Apply at the timing and frequency needed based on scouting and economic thresholds. Rates depend on the specific crop and insect threat. Check label for appropriate application rate and timing.
