Grizzly[®] Too: Unbearable for bugs

Grizzly[®] Too insecticide utilizes the industry leading microencapsulated lambda-cyhalothrin formulation (group 3A pyrethroid) for superior handling, mixing, and insect control. As a leading insecticide, it effectively controls many insects such as orange blossom, midge and cereal leaf beetle in wheat and various weevils, leafhoppers, and aphids in alfalfa.

FEATURES AND BENEFITS

- Water based formulation with microencapsulation technology provides quick release and knockdown, easier mixing, and improved applicator safety
- UV blocker protects against sunlight degradation allowing longer residual control, all while being rainfast in just one hour
- Two pounds of lambda-Cyhalothrin offers less storage and handling than 1 lb. formulation

Grizzly[®] Too Application Rates

Crop	Rate (fl. oz. per acre)	PHI (days)
Alfalfa	0.96 to 1.92	1 forage, 7 hay
Corn (field, seed, pop)	0.96 to 1.92	21
Corn (sweet)	1.28 to 1.92	1*
Cotton	0.96 to 1.92	21
Cucurbit vegetables	1.28 to 1.92	1
Rice	1.60 to 2.56	21-27
Soybean	0.96 to 1.92	30

Tree nuts	1.28 to 2.56	14
Wheat	0.96 to 1.92	30

*See label

USE RATE[†]

Varies depending on specific crop and insect. See label for details.

ACTIVE INGREDIENTS[†]

22.8%: Lambda-Cyhalothrin
77.2% Other Ingredients
100%: Total
Contains 2.08 pounds of active ingredient per gallon and is a capsule suspension.

PACKAGING[†]

4x1-gallon jugs
