

Liquid Boron 10%

By WINFIELD

Increases plant growth and health

Boron for Optimum Crop Production

Liquid Boron 10% is effective as a readily available source of boron for soil, foliar and aerial application. Offering flexibility of use, it is compatible with most pesticides.

Plant Health Benefits

Boron is essential to nitrogen metabolism, cell division, and increased flowering and fruiting. Boron also increases pollen number, pollen viability and pollen tube elongation. As a result, plants produce more blooms that mature into larger volumes of fruit.

Ingredients

Boron	10.0%
-------	-------

Liquid Boron 10% contains 1.1 pounds of boron per gallon.

WinField™ Plant Nutrition

WinField™ plant nutrition provides high-quality plant nutrients for healthy plants and high yields.

These proven, versatile performers are specially formulated to meet the nutritional needs of crops across a broad range of soil conditions, fertility programs and tillage practices.

Factors Affecting Micronutrient Availability

- Soil pH
- Organic matter content
- Soil texture
- Soil water content
- Nutrient interactions
- Temperature

Precise Treatments

Tissue sampling and analysis with the NutriSolutions® Tool just before key growth stages will pinpoint nutrient deficiencies and recommend specific plant nutrients, so that you can apply exactly what your crop needs and nothing it doesn't.

Use Rates

Soil application	2 to 8 quarts per acre
Foliar application	1 to 2 quarts per acre at 10- to 14-day intervals

Packaging

2 x 2.5-gallon jugs
250-gallon tote
Bulk
