

# PowerLock<sup>®</sup>

By WINFIELD  
UNITED

## Premix formulation of InterLock<sup>®</sup> and Preference<sup>®</sup> Adjuvants

PowerLock<sup>®</sup> adjuvant combines two signature adjuvants into one powerful jug to lock in spray coverage and deposition, lock out drift and improve spray droplet retention and contact angle. Ideal for optimizing fungicide, insecticide, herbicide and defoliant performance.

### FEATURES AND BENEFITS

- Improved adhesion of spray droplets
- Increase leaf area coverage on target plants
- Better protection against ultraviolet rays for less spray degradation
- Reduces spray drift and evaporation of pesticides
- Deeper canopy penetration for increased deposition
- Increase leaf area coverage on target plants
- Decreases rate of spray evaporation

#### USE RATE<sup>†</sup>

5 to 8 fluid ounces per acre

#### Principle Functioning Agents<sup>†</sup>

Modified vegetable oil, alkyl phenol ethoxylate, vegetable oil: 95%  
Constituents ineffective as spray adjuvant: 5%

#### PACKAGING

2 x 2.5 gallon jugs  
Mini-Bulk  
Bulk
