SRN28™

An easy to use slow release fertilizer designed for the grower who prefers a water soluble formulation for delivering supplemental nitrogen to their crop.

Benefits of using SRN28™:
- Easy to handle and well suited for ground and aerial applications.
- Provides both a slow and quick release source of nitrogen.
- Helps reduce nitrogen loss from varying environmental conditions.
- Safe to apply directly to foliage, assisting in reducing soil applied nitrogen needs.
- Proven results with low salt, minimal phytotoxicity and non-corrosive.

SRN28 is a non-burning clear solution containing 28% nitrogen. Each gallon consists of a mixture of 20.2% slow release methylene urea and 7.8% liquid urea designed to provide a consistent source of nitrogen for several weeks.

</table>

---

**MIXING INSTRUCTIONS**

1. Add 1/2 total water to tank
2. Turn on recirculation line.
3. Add prescribed amount of SRN28
4. Add any soluble powders.
5. Add liquid flowable materials.
6. Bring water to volume and recirculate before spraying.

<table>
<thead>
<tr>
<th>Crop</th>
<th>Rate Information</th>
</tr>
</thead>
<tbody>
<tr>
<td>Alfalfa</td>
<td>1-3 gal/acre after each cutting when sufficient foliage is present. Applies: 1.5-1.5 gal/acre in bud swell to king bloom and 1.15 gal. 30 days later. 1.5-1.5 gal 30-40 days prior to harvest for sizing. Post harvest: Apply 3-5 gal/acre in 1 or 2 applications.</td>
</tr>
<tr>
<td>Snap Beans</td>
<td>3 gal/acre at early bloom (with fungicide). Can be applied in split applications.</td>
</tr>
<tr>
<td>Dry Beans</td>
<td>2-3 gal/acre at early bloom and repeat after pods are formed.</td>
</tr>
<tr>
<td>Green Beans &amp; Peas</td>
<td>1-3 gal/acre is applied shortly after flowers appear and repeat 10-14 days later.</td>
</tr>
<tr>
<td>Lima Beans</td>
<td>2-3 gal/acre at early bloom and repeat after pod fill begins.</td>
</tr>
<tr>
<td>Cabbage</td>
<td>(Okra Choy &amp; Napa), Cauliflower, Broccoli: 2-3 gal/acre at early head formation and repeat 3-7 days later.</td>
</tr>
<tr>
<td>Corn</td>
<td>1-2 gal/acre just prior to bolting.</td>
</tr>
<tr>
<td>Celery</td>
<td>1-2 gal/acre 10 days after transplanting. Repeat at 2 gal/acre in 3 tasseling 3 weeks until harvest, using 7.4 gal, total over crop.</td>
</tr>
<tr>
<td>Citrus</td>
<td>1-1.5 gal/acre at pre-bloom or bloom to increase fruit set and repeat in 30 days. Subsequent applications when nitrogen needs are evident.</td>
</tr>
<tr>
<td>Corn: 1-1.5 gal/acre from 3 - 5 leaf stage (V5 - V8) and again at 12-15 leaf stage (V8-V9).</td>
<td></td>
</tr>
<tr>
<td>Corn (Seed)</td>
<td>1-gal/acre before denting and repeat after polllination.</td>
</tr>
<tr>
<td>Corn (Sweet): 2-3 gal/acre at a 12-14 inch height (V5-V8), at early tassel stage, and again at early milk stage.</td>
<td></td>
</tr>
<tr>
<td>Corn with Fusigas or Inocinsene: Apply 1-2 gal/acre at V5 and/or VT stage (tasseling). Apply 1-2 gal/acre after silk emergence and pollination at R2 (blossom) through R4 stage (dough) of growth.</td>
<td></td>
</tr>
<tr>
<td>Cotton: Early Season: 1-2 gals/in an over the row application after plants reach 4 leaf stage. Mid-Season: 2-5 gal/acre at early bloom and repeat as necessary.</td>
<td></td>
</tr>
<tr>
<td>Cucumbers, Squash, Pumpkins, Watermelons, Cantaloupes: 1-3 gal/acre at early bloom and repeat approximately 4 weeks after bloom application.</td>
<td></td>
</tr>
<tr>
<td>Garlic: Spray 2-3 gal/acre directed over row from 10-12 inches high. Make 2-4 applications.</td>
<td></td>
</tr>

**PRECAUTIONARY STATEMENTS**

**If medical advice is needed, have product container or label at hand.**

**If irritation occurs:**

- Call a POISON CENTER or doctor/physician if you feel unwell.
- Wash hands, face and other affected areas thoroughly after handling. Wear protective gloves/protective clothing/eye protection/face protection.
- **If swallowed:**
  - Have person drink large volumes of water (2 to 4 glasses of water). Call a poison control center or physician immediately for treatment advice.
- **If in eyes:** Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Call a poison control center or physician immediately for treatment advice.
- **If on skin or clothing:** Wash hands, face and other affected areas thoroughly after handling. Wear protective gloves/protective clothing/eye protection/face protection.
- **If on skin:**
  - Wash hands, face and other affected areas thoroughly after handling. Wear protective gloves/protective clothing/eye protection/face protection.
- **If inhaled:**
  - Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control center or physician for further treatment advice.
- **If swallowed:**
  - Have person drink large volumes of water (2 to 4 glasses of water). Call a poison control center or physician immediately for treatment advice.
- **If in eyes:** Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
- **If eye irritation persists:**
  - Get medical advice/attention.
