

Ultra-Lite[®]

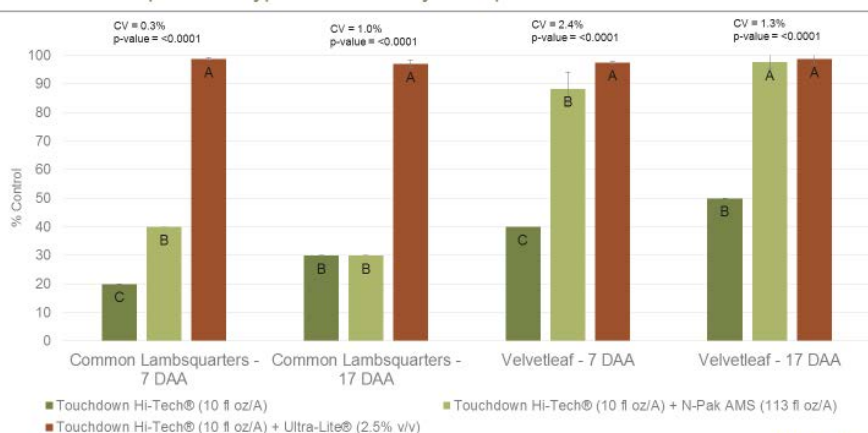

By WINFIELD
UNITED

A user-friendly premix of ammonium sulfate and surfactant designed for use with glyphosate and other pesticide systems.

FEATURES AND BENEFITS

- Improved wetting.
- Increased surface tension reduction.
- Enhanced herbicide movement through the leaf surface.
- Guards against hard water antagonism that reduces herbicide activity.
- Adds ammonium ions to help increase plant uptakes of herbicide.

Ultra-Lite[®] Improves Glyphosate Activity Compared to AMS

WinField United Research
River Falls, WI, 2016

Means within rating date and weed with the same letters are not statistically different.

USE RATE†

1.25 – 5 gallons/100 gallons

Principal Functioning Agents†

Ammonium sulfate, polyols, alkyl polyoxyethylene sulfate and aryl sulfonate: 48%
Constituents ineffective as spray adjuvants: 52%
Total: 100%

PACKAGING

2 x 2.5 gallons
120 gallons
125 gallons
250 gallons
Mini-bulk
Bulk gallons

Amount of NIS and Dry AMS in Ultra-Lite[®] per 100 gallons of Spray Solution

Ultra-Lite [®] (gallons)		Nonionic Surfactant (quarts)		Dry AMS (pounds)
1.25	=	0.5	+	4.25
2.5	=	1.0	+	8.5
5.0	=	2.0	+	17.0
