

Warden® Cereals 360

By WINFIELD

An all-encompassing seed treatment for the protection of emerging cereals

Protection against diseases and insects, plus improved germination and emergence

Warden® Cereals 360 is a one-of-a-kind seed treatment that combines the protection of three top-of-the-line fungicides and an industry-leading insecticide, along with Ascend®, the best plant growth regulator from WinField® for improved germination and emergence.

Protect the roots

To protect the root system against harmful early season diseases, three fungicides provide systemic disease control. In addition, Cruiser® insecticide helps control a wide variety of insects while its patented Vigor Effect helps improve plant quality and stem strength.

Sedaxane is specifically formulated for seed treatments and provides excellent protection against *Rhizoctonia*.

Mefenoxam protects young plants from *Phytophthora* and *Pythium* damping off early in the year.

Difenoconazole is a proven broad spectrum fungicide that controls a wide variety of fungi.

Use rates and application

5 fluid ounces per 100 pounds of seed

Warden® Cereals 360 can be applied through an on-site seed treater, commercially or by a seed company.

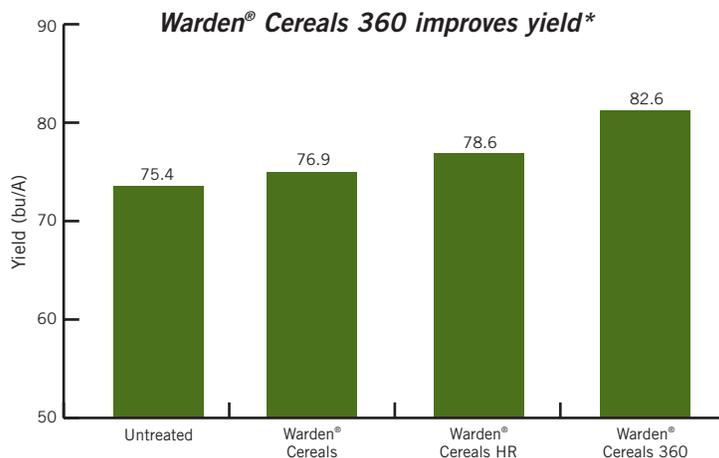

Enhance development with Ascend® plant growth regulator

Warden® Cereals 360 includes Ascend® plant growth regulator, a proprietary product that contains an optimal combination of three plant growth regulators to aid in early plant germination, emergence and the development of a robust root system.

Cytokinin (kinetin) promotes cell division, leaf expansion and vigor while slowing leaf aging.

Gibberellic Acid stimulates seed germination, cell division and elongation in leaves and stems.

Indolebutyric Acid (IBA) stimulates root formation and development, and increases cell elongation.

*2014 WinField® Answer Plot® data from 10 locations throughout MT, ND, SD, and the Pacific Northwest.
