Weld[®]: The Perennial Favorite

Weld[®] herbicide is a premix of three active ingredients (Fluroxypyr, Clopyralid, MCPA) formulated as one powerful brand for controlling annual and perennial broadleaf weeds, including kochia, dandelion, and Canada thistle. Weld[®] can be applied from 3rd leaf up to flag leaf emergence.

FEATURES AND BENEFITS

- Three active ingredients specifically designed to control a broad spectrum of annual and perennial broadleaf weeds in wheat, barley, and oats.
 - Fluroxypyr – Group 4: Strong Kochia control
 - Clopyralid – Group 4: Fast acting control, usually show symptoms in 1-2 days
 - MCPA – Group 4: Controls a broad spectrum of broadleaf weeds
