Fax (optional) \_\_\_\_\_

#### Sampling:

**When:** 1-3 weeks after black layers have formed on 80% of the kernels of most ears

**Amount:** For field of 15 acres or less – 15 stalks. For fields larger than 15 acres – 1 stalk per acre.

Areas of different soil types and/or management should be sampled separately.

**How:** First cut the stalk 14" from the ground and cut the 6" from the ground off leaving 8" stalk

**Shipping:** Do not use plastic bags. Keep refrigerated if stored for more than one day.
